DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen in view of Beetz et. al..

Chen shows the claimed invention except for the use of a projection block in a slot to limit movement of the two handles with respect to each other. Beetz et. al. suggests that a pliers tool can have a pin in a slot for the purpose of limiting relative movement of the handles. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Chen by using a pin or block in a slot for the purpose of limiting relative handle movement because Beetz et. al. suggests the use of such a construction in pliers for the same purpose as claimed by applicant.

Allowable Subject Matter

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
